

COR+GARD® COATINGS

The COR+GARD® family of coatings provide chemical protection against biogenic corrosion caused by industrial waste. Application is easy, and the coatings are highly resistant to a wide range of acids and temperatures.

Manhole coated with COR+GARD®

COATING PRODUCTS:

COR+GARD®

- Protects against hydrogen sulfide in sewer systems
- Quickly bonds to freshly applied mortar
- Produces a smooth, glossy, homogeneous layer

Cor+Gard® 301

- Protects against hydrogen sulfide in sewer systems
- 3-to-1 ratio
- Increases tensile strength
- Quickly bonds to freshly applied mortar
- Produces a smooth, glossy, homogeneous layer

Channel Line

- Protects against hydrogen sulfide in sewer systems
- Enables quick lining of manhole channels & benches
- Rapid-setting & high-strength
- Moisture insensitive

Cor+Gard® B4 Primer

- For surface preparation prior to epoxy application
- New solvent-free technology
- Provides excellent sealing over fresh concrete & damp masonry
- Stands alone as a concrete sealer
- Provides excellent resistance to chemicals, staining & solvents
- Increases window of main coating application
