

## CONCRETE SEALANTS

APM offers multiple concrete sealant options.

## CONCRETE SEALANT PRODUCTS:

### Crystal-X® WSH

- Seals out water & binds back dust, hardens & enhances the surface to resist abrasion
- Becomes part of the substrate
- Non-toxic & resistant to aggressive chemicals
- Can be applied to the positive or negative side of concrete & does not require a dry surface
- Cannot puncture, tear or come apart at the seams

### CS Identifier

- Used to identify the use of CON<sup>mic</sup>SHIELD® in concrete for protection against microbiologically induced corrosion (MIC)
- Forms a uniform film on concrete & mortar surfaces
- Acrylic-based
- Meets ASTM C-309 & C-1315 standards

### COR+GARD® FLEX-JOINT

- Adhesive sealant for precast joints, manhole frames, adjusting rings & pipe penetrations
- Versatile for a variety of substrates
- Cures quickly
- Weather- & corrosion-resistant
- Remains flexible to -40° F
- Contains no solvents or isocyanates
- Non-yellowing

### 1315 Sealer

- A penetrator/sealer used for curing & sealing exposed aggregate concrete surfaces, precast concrete, mortar, stone, rock face, tilt up, stucco, etc.
- Protects against abrasion & chemical attack
- Prevents discoloration due to staining from efflorescence, dust, air pollutants & chemical spills
